REACH - Declaration

Dear Valued Customer,

The Identive ID Infrastructure Division is a leading provider of solutions for secure access, secure identity and secure exchange. The company offers the world's broadest range of contact, contactless and mobile smart card reader and terminal technology, digital identity and transaction platforms, as well as systems that integrate physical and logical access control. Additionally, the ID Infrastructure Division is a leading provider of commercial digital media readers to the worldwide photo kiosk market. The smart card-based products and solutions are utilized around the world to enable security and identification applications, transaction systems, eHealth- and eGovernment programs and physical access systems. The company also offers a range of smart card-based security, productivity and time recording solutions for small and medium-size businesses under its retail CHIPDRIVE® brand.

The ID Infrastructure Division is manufacturer of electronic products, thus, in the sense of REACH, we are so called "downstream users". The products we supply to you are solely non-chemical products (goods). Moreover and under normal and reasonably foreseeable circumstances of application, the goods supplied to you shall not release any substance. For that, ID Infrastructure Division is neither obligatory for registration nor for the creation of material safety data sheet (MSDS).

Furthermore, we will immediately inform you in correspondence to REACH – Article 33 if any substance of content (as from a content of >0.1%) in our goods will be classified alarming by the European Agency for Chemicals ECHA. Based on the current status, however, we do not expect such an incidence.

Independent of that fact, we are intensively pursuing the realisation of REACH on the part of our suppliers; we do that in our own interest and in order to guarantee a high level of product safety for our customers. We are in close contact with our suppliers of chemistry and prepared material (e.g. manufacturing supplies for manufacturing, processing and workmanship of our products or for the utilisation within other operative processes) and will implement the pre-registration and/or later registration of the relevant materials in REACH respectively in our process of supplier qualification.

Identive GmbH
